# **RIICCM202D Identify, locate and protect underground services**

Release: 4

## **RIICCM202D** Identify, locate and protect underground services

Release	Comment
1	This unit replaces RIICCM202A Identify, locate and protect underground services.
2	Editorial corrections.
3	Amended Performance Evidence.
4	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

#### **Modification History**

# Application

This unit describes a participant's skills and knowledge required to identify, locate and protect underground services in Civil Construction.

This unit is appropriate for those working in operational roles.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and Industry sectors. Relevant information must be sourced prior to application of the unit.

#### **Unit Sector**

Civil construction

# **Elements and Performance Criteria**

1. Plan and prepare for identify, locate and protect underground services       1.1 Access, interpret and apply underground services documentation and ensure the work activity is compliant         1.2 Obtain, read, interpret, clarify and confirm work requirements services       1.3 Identify, obtain and implement traffic signage requirements         1.3 Identify, obtain and implement traffic signage requirements       1.4 Select, and check for faults, equipment/tools for work activities         1.5 Identify and apply environmental protection requirements prior to making contact with the service provider (Dial Before You Dig)       1.7 Determine location, alignment direction, level and grade of services and/or utilities from the plans and location details         2. Locate underground services       2.1 Obtain details of services and utilities location from the site owners         2.2 Determine emergency numbers, contact details and procedures for types, and owners, of the services/utilities       2.3 Contact owners of the services/utilities         2.3 Contact owners of the services/utilities       2.4 Select appropriate plant/equipment, and search for services/utilities prior to commencing construction may impact         2.5 Use visual or physical means to search for services and/or utilities prior to commencing construction       2.6 Move, protect and support services/utilities from the construction process in conjunction with the service/utility owner         2.7 Report any damage to services/utilities form the construction process in conjunction with the service/utility owner       3.1 Clear work area and dispose of or recycle materials         3.2 Conduct       <		
services1.2Obtain, read, metplet, chainy and confirm work requirements1.3Identify, obtain and implement traffic signage requirements1.4Select, and check for faults, equipment/tools for work activities1.5Identify and apply environmental protection requirements1.6Obtain and prepare information for search requirements prior to making contact with the service provider (Dial Before You Dig)1.7Determine location, alignment direction, level and grade of services and/or utilities from the plans and location details2. Locate underground services2.1Obtain details of services and utilities location from the site owners2.2Determine emergency numbers, contact details and procedures for types, and owners, of the services/utilities2.3Contact owners of the services/utilities2.4Select appropriate plant/equipment, and search for services/utilities on which construction may impact2.5Use visual or physical means to search for services and/or utilities prior to commencing construction 2.63. Conduct housekeeping activities3.1Clear work area and dispose of or recycle materials 3.23.3Manage/report hazards, and maintain a safe working environment		
1.3Identify, obtain and implement traffic signage requirements1.4Select, and check for faults, equipment/tools for work activities1.5Identify and apply environmental protection requirements1.6Obtain and prepare information for search requirements prior to making contact with the service provider (Dial Before You Dig)1.7Determine location, alignment direction, level and grade of services and/or utilities from the plans and location details2.
